ABOUT ME

I am a Junior Frontend Developer with a solid foundation in HTML, CSS, JavaScript, and Vue.js, eager to further my growth in web development. I am excited to implement my acquired knowledge and practical skills in a team that works with modern front-end technologies.

Technical Skills:
· JavaScript: Good knowledge of synchronous and asynchronous programming, working with arrays and objects.
· Vue.js (Vue 3): Understanding of architecture, component creation, reactivity management, use of the Composition API and directives.
· HTML5/CSS3: Proficiency in responsive design, basics of CSS preprocessors (SCSS), and knowledge of Flexbox and Grid.
· Working with APIs: Experience in retrieving and processing data using Fetch.
· Development Tools: Familiarity with Git and npm.
· Working with Figma: Layout and design adaptation based on layouts

I am fluent in Ukrainian, have a conversational level of Polish, and am actively working to improve my English, currently at a B1-B2 level.

WORK EXPERIENCE

UVOCORP

Developer
February 2023 – October 2023
